PROFILE

I am a Backend Developer skilled in C#, ASP.NET, and API development. I have experience in secure data handling, authentication, and object-oriented programming. I have a strong foundation in C++, OOP, and Data Structure Algorithms. I am committed to delivering efficient, secure backend solutions for dynamic development teams.

EDUCATION

Bachelor of Computer And Information Science   09/2020 – 07/2024
Mansoura University 🔗

SKILLS

Back-End Development
PHP, MYSQL, Laravel
C#,SQL SERVER,ASP.NET

Programming Basics
C++, OOP, Data structure, Algorithms.

Problem Solving
CodeForces 🔗 , LeetCode 🔗

Front-End Technologies
HTML5, CSS

Tools
Git, Github, Postman, VS code, VS Community

Languages
Arabic(Native),English(Good)

PROJECTS

LOCUS (Space App) APIs 🔗   07/2023 – 10/2024
Graduation Project
- Developed user registration, login/logout, and OTP-based email verification APIs.
- Designed a secure password reset function and APIs for retrieving space-related events.
- Created a community module for user interactions (posting, liking, commenting).

Documentation. 🔗

Full Bank System 🔗   08/2024 – 10/2024
- Designed a C++ file-based management system for clients, employees, and admins.
- Implemented functionalities for adding, retrieving, and managing user credentials and account balances.
- Utilized a DataSourceInterface to enhance modularity and ensure secure data handling.
- Designed and implemented user-friendly screens for managing user credentials, balances, and salaries.

Library System 🔗   06/2024
Library system using C++
- Practice Cpp language by making a library system that lets users make functions like add, update, remove, search, borrow, return, and display books—using functions only.

CERTIFICATES

- Programming Fundamentals 🔗
- Linux 🔗
- Web-Development 🔗
- GIT&GITHUB 🔗
- SQL 🔗
